

Simply Authentic

Smart real wood-PVC
molding system

Solid wood interior moldings are the casement or awning window option that enhances your regular PVC windows.

The warmth of real wood adds a classier, more upscale look.

Lets you match wood and hardware to your kitchen cabinetry or doorknobs to create a unified look between windows and décor.

Your home's outside appearance remains unchanged—for example, living room windows with interior wood mesh perfectly with bathroom windows with PVC interiors.

Smart real wood-PVC molding system

- Innovative molding system assembles and screws right into the PVC frame (patent pending), allowing use of screens
- 90° assembly system gives windows a genuine wood look
- No contact between glass and wood, reducing risk of premature wood aging
- Wood remains protected from the elements, even when windows are opened to allow ventilation
- Designed for a wide range of energy-efficient glass, of varied thicknesses
- Choice of wood types
- Fixed, panoramic, or casement windows can be combined in a variety of configurations

PVC window performance remains unchanged

Casement or awning windows with solid wood interior moldings provide the same superior protection whatever the rigors of the elements—wind, rain, cold, or heat. They're watertight, insulated, and solid.

- **Superior quality, maintenance-free PVC frames**
- **No water or air leaks, no energy loss**
- **Multichamber system for thermal insulation and sound reduction**
- **Window performance results are unchanged**

System warranty

P.H. Tech Inc. provides a 20-year limited warranty on all residential uPVC profiles.

Manufacturer's warranty may offer coverage that is different than P.H. Tech's.

Test results for product manufactured according to P.H. Tech specifications
